Forecast for Monday 25 Oct 2021

Weather: Sunny intervals and occasional showers, these wintry above 900 metres, some hail possible too. Chance of some longer spells of rain or higher summit snow in the north at times.

Chance of cloud free mountain/hill tops above 800m: 70%, best chance across the south of the area

Visibility: Excellent visibility outside of showers. Quickly becoming poor in any wintry precipitation, with cloud down to 700 metres as heavier showers pass by.

Met Office Aberdeen Meteorologist's View

Gales expected on the summits will make for slow progress and wind chill. Risk of icy surfaces on the highest tops.

Forecast for Tuesday 26 Oct 2021

Weather: After a dry start rain will soon spread from the west. Some persistent rain developing across the Trossachs, Argyll and southern Lochaber at times, more especially later in the afternoon onwards. Some drier conditions developing across Kintyre, Arran and Jura. Mull may see some drier interludes but this much less certain.

Maximum wind: Widespread upland southwesterly gales, with gusts 60 to 70 mph on the higher tops.

Chance of cloud free mountain/hill tops above 800m: 30%, best chance in the northeast of the area

Visibility: Good in the more sheltered south across southern Kintyre and Arran. Otherwise poor in cloud down to 700 metres, this most persistent and extensive across Lochaber and Argyll.

Temperature: **Glens:** Plus 5 rising to 15 Celsius
At 800m: Plus 4 rising to 9 Celsius
Freezing level: Above summits
